Metropolitan Transportation Authority Fare Data Overview

General Description

Data file provides data showing the number of vehicles (including cars, buses, trucks and motorcycles). These files show the number of MetroCard swipes made each week by customers entering each station of the New York City Subway, PATH, AirTrain JFK and the Roosevelt Island Tram, broken out to show the relative popularity of the various types of MetroCards.

Data Collection Methodology

This data is collected on a weekly basis. MTA New York City Transit posts the latest data every Saturday by 1 a.m., and the dates listed in the links reference the date the data is posted. The data in the files covers seven-day periods beginning on the Saturday two weeks prior to the posting date and ending on the following Friday.

Statistical and Analytic Issues

There are no analytical issues at this time.

Limitations of Data Use

There are no limitations on this data at this time.
